**Low Floor  
LFW**

a brand of North American Bus Industries, Inc.

# LFW (Low Floor Bus)

The LFW is offered in 31', 35', 40', and 60' lengths which make it a perfect choice for transit properties wanting a family of products. The LFW has gone through a recent face lift with a new styling package taking its exterior design cues from the NABI BRT series. This design includes a sleek, aerodynamic front end and windshield module, as well as larger side windows with far fewer seams, creating the appearance of one, large, space-age styled piece of glass. The end result is a futuristic look that helps give mass transit a more modern personality. Inside the buses, new modern seating and fabrics welcome passengers, and the driver's cockpit has undergone ergonomic advancements.

## Technical Specifications
